

The European Society of Regional Anesthesia (ESRA) and the American Society of Regional Anesthesia (ASRA)

Joint Committee Practice Advisory on Pediatric Regional Anesthesia

The aim of this working party is to write recommendations on Pediatric Regional Anesthesia, similar to the USGRA recommendations in order to make paediatric regional anaesthesia safer and performed worldwide.

The group decided to start the recommendations with some “hot topics” such as sedation & regional anesthesia, test dose, compartment syndrome and air vs saline epidural detection.
